

# MLT's Accreditation

By: Nurul Izza

The Diploma of Medical Laboratory Technology programme was initiated in March 2008. There were 30 students enrolled in the first batch. Since its inception, the school was planning and preparing to be accredited by the Jabatan Perkhidmatan Awam (JPA). The Accreditation Team comprises of Dr. Roslinah Mohamad Hussain (Universiti Teknologi MARA), Mr. Mohd Soffian bin Abdullah (Hospital Selayang, KKM) and Mr. Fazli bin Abdul Majid (JPA, Putrajaya). They visited our school on 20th - to 23rd September 2010.

The team reviewed the Medical Laboratory Technology document and assessed whether it meets the accreditation standards and its own objectives. The team clarified the information in the accreditation submission through discussions with senior academics and administrators involved in the relevant education programs, the students and others involved with delivery of the education programs. After clarifying and discussion, the team visited relevant areas of the school, mainly the Ibnu Sina Resources Centre, Histopathology Lab, Microbiology Lab, Multipurpose Laboratory and Clinical Skills Laboratory.
