Saturday, 31 May – Universiti Malaysia Sabah (UMS) World Forestry Day celebration recently was put into focus by several parties.

Borneo Triton Club (BTC) was among the parties who are involved in celebrating the day.

16 of their members joined and take part with their own trucks to celebrate and help with the planting trees program as one of the activities for the celebration.

The President, Vic Codfrey Marcussaid, BTC feel called to join in this programme as awareness on the importance of sustainability of forests as natural resource that have benefited to the mankind.

"As we all know, forest vegetation is the major oxygen supplier which is our basis of life in this world. Without forest, human and other living creature will not be able to live," he said.

He said, besides playing a role important in offsetting the air quality level and reducing global warming phenomenon, the retention of the greenness of the environment is also crucial for us to inherit for the future generation.

Hence, he added, activities that can be destructive to the forest like unplanned explorations and illegal logging need to be overcome and handled together.
