**TUESDAY, 01 JULY** – A health screening programme sponsored by the Public Health Department received encouraging response from staff of Universiti Malaysia Sabah, Labuan International Campus (UMSKAL).

The health screening programme was held at the foyer of the Tower Building today and many academicians and support staff were seen to be making a bee-line to the health screening counter.

Youths and Sports Officer, Gabriel Moinjil said the programme was very important and should be held at

least twice a year.

Meanwhile, Assistant Administrative Officer, Che Din Md Salleh said through the health screening activity, staff would know the status of their health including blood pressure.

“The advice from the doctor would help keep us healthy, which include information on nutrition and daily activities,” he concluded. – *SS (fl)*
