Preface

Dear colleague,

It has been quite sometime for us to prepare this revision book for postgraduate ophthalmologist, eventually it becomes real. Throughout the world, MRCSED Part I exam is conducted conjointly with many other examination boards especially in Hong Kong and Singapore. Successful in this exam is a door way to the next stage of the postgraduate exam.

This book is written solely of giving the candidates some ideas regarding this exam, we sincerely hope you will be successful in your attempt. Certainly, to make the book more interactive, we do prepare some quiz in each chapter. If you would like to confirm your answer with us or have more assistance, please feel free to email us (seanlee@ums.edu.my). Once again, we thank you for your support.
