

Developing affordable teaching aid module

Abstract

There is a gap to develop software to enhance the number of software modules, and reduce the burden on the module that lecturers prepare as teaching aid. This study shows that a software is used to develop Ulead COOL 3D3.5 of Microsoft PowerPoint2007, Adobe's Photoshop CS2, Sony stereo forging 8.0, 5.0, 8.0 Ulead GIF animation of Macromedia Flash, Macromedia's Authorware7.0 and Sony Las Vegas 7.0 software. The software includes multimedia elements, able to attract the attention of students, so that students are more interested in studying this topic, formative and summative evaluation, and the teaching and training courses included vocabulary, and computer network support, and allows for further lecturers explanation and to provide students with the latest information. With the production of this software it's really hope it can help lecturers in teaching and learning process.
