

## **Whole-genome sequencing of streptomycin-resistant *Mycobacterium tuberculosis* strain SBH145 from Sabah, Malaysia**

### **ABSTRACT**

This paper reports on the whole-genome sequencing of a streptomycin-resistant *Mycobacterium tuberculosis* strain that was isolated from a patient with pulmonary tuberculosis in Sabah state of Malaysian Borneo. The strain belongs to the EAI2-Manila family of lineage 1 and is clustered with *M. tuberculosis* strains from the Philippines, India, and Taiwan.
