

**Studies on Schimatoglottideae (Araceae) of Borneo LXIX: Schimatoglottis
imbakensis, a new species of the Patentineria Complex from ultramafic rocks,
Sabah**

ABSTRACT

Schimatoglottis imbakensis is described as a new species of the Schimatoglottis Patentineria Clade from forested ultramafic rocks, and compared with *S. retineria* Furtado, the only the species for the clade yet described from Sabah.
