

**Studies on Monstereae (Araceae) of Borneo II: Furtado's Rhapsidophora  
kinabaluensis elucidated and transferred to Scindapsus**

**ABSTRACT**

*Rhapsidophora kinabaluensis* Furtado (Araceae: Monstereae), described from Sabah, Malaysian Borneo, has been recollected and revealed to be a species of *Scindapsus* Schott belonging to a species complex surrounding *S. coriaceus* Engl. The taxonomic transfer is made – *S. kinabaluensis* (Furtado) Kartini & P. C. Boyce, comb. nov. – and a description, colour illustrations and list of specimens are provided. Defining characteristics and current taxonomy of the *Scindapsus Coriaceus* Complex are summarized.
