

Flavonoids from the Borneo Plant Species: *Eusideroxylon zwageri* Teijsm. & Binn.

ABSTRACT

A new flavonoid, 7,3'-dihydroxy-3,5,4'-trimethoxy flavone, along with two known flavonoids, 7-hydroxy-5,4'-dimethoxyflavone and 7-hydroxy-3,5,4'-trimethoxy flavone were isolated from the leaves ethyl acetate extract of *Eusideroxylon zwageri* Teijsm. & Binn. (Lauraceae). Structures were elucidated by spectroscopic techniques such as NMR, IR, and Orbitrap Mass Spectrometry.
